

“Internet of things: An Era of Digitalization (IoT:AEoD-2017)” on 1st April, 2017

National Conference on IoT: An Era of Digitalization (IoT-EoD-2017), aims at promoting high quality research by bringing together community of researchers and practitioners from academia and industry. It is a forum to communicate and discuss various research findings and innovations in digitalization and IoT. These emerging areas provide great scope for research and will help to address several challenges in future.

Internet of Things: Pervasive connectivity, smart devices and demand for data testify to an Internet of Things that will continue to grow by leaps and bounds. Instrumenting and connecting devices has massive potential to deliver value, but there is need for a coordinated effort when rolling out the next generation of self-reporting paradigms. This conference aims at bringing together researchers to share, discuss and witness cutting edge research in all areas of development on Information & Technology.
